

Manufacturer Specific-Training

Upon completion of the 18-week Motorcycle Technician Prerequisite (MTP), UTI students then take their learning to higher levels with manufacturer-specific training supported by major motorcycle manufacturers. UTI Students may choose to add as many manufacturers to your training program as they feel will satisfy their career goals through program upgrades or graduate re-enrollment process. Because many motorcycle dealerships service and sell various product lines, UTI graduates with specialized training in multiple areas are preferred. The manufacturer-specific training is supported by the following manufacturers:

- BMW Motorrad
- Harley-Davidson
- Honda
- Kawasaki
- Suzuki
- Yamaha
